

CROSSLINDO 0430

I. DESCRIPTION

CROSSLINDO 0430 is a reactive aliphatic, less hygroscopic polyamine which has good hardness and good clarity. It is designed as cross-linking agent for liquid epoxy resins. It has good workability and rapid cure at room temperature still delivering convenient viscosity at mixing rates. It is particularly suitable for colorless coatings or adhesive systems.

II. PROPERTIES

- Good hardness
- Good wetting properties
- Good clarity and leveling
- Low viscosity

III. SUGGESTED USES

- Epoxy hardener for civil projects (e.g. flooring)
- Maintenance paints
- Two-pack adhesives
- Castings and hand lay-up laminates

IV. COMPOSITION

- Modifier : Proprietary polyamine
- Amine Hydrogen Equivalent Weight : approx. 120 g/equivalent

V. SPECIFICATION

- Viscosity (mPaS, 30°C) : max 120
- Color (Gardner) : max. 2
- Appearance : clear to light yellow liquid
- Density (25°C) : 1.00 – 1.10 g/cm³

VI. COMPATIBILITY

- Aromatic : dilutable
- Ester : dilutable
- Alcohol : dilutable

VII. PACKING

The hardener is supplied in steel drum with net content 200 kgs.

VIII. STORAGE

Store in proper warehouse.

Keep container closed when not in use.
